Converting Systems specializes in a variety of winders and unwinders to fit your application, including Single/Dual Turret Center Driven Winders (with auto-cutover, taper tension, individual spindle drives and microprocessor touch screen controls), trim winders, re-winders and driven un-winders. For older winders, CSI provides on-site control system upgrades as well as full rebuilding services, incorporating "new" machine features and a full warranty for a fraction of the cost of a new winder. CSI's "Rebuilding Loaner Program" minimizes downtime. Visit www.ConvertingSystems.com for specifications or search www.CSI-Parts.com to order replacement parts for all makes and models.
